

The facts on tuition

The university uses tuition revenue combined with the provincial operating grant to:

- provide high value academic programming and services;
- fund program and delivery enhancements, and student supports, to ensure success following graduation; and
- set aside financial aid to ensure students' needs are met.

Our tuition rates are set annually based on five principles:

1. Comparability to similar programs at other Canadian U15 medical-doctoral universities;
2. Accessibility and affordability for students;
3. Enabling quality of our programs and the need to ensure our students receive a high-quality education;
4. Predictability of tuition to support longer-term planning for students; and
5. Transparency through consultation with students to ensure a common understanding on tuition.

Grad Studies – course (credit unit)	\$293	\$659

Rates in the table above reflect a typical student course offering within the program.

For full-time undergraduate students, a typical student's program includes classes offered by different colleges, so the average tuition cost to students may reflect a blended rate of different tuition categories and covers eight months (September – April). For graduate students, a typical student is enrolled on-campus in a full-time thesis program and is continuously enrolled throughout the year.

For a vast majority of programs, international students will pay a differential rate of 4.84 for undergraduates, and 2.25 for master's students.

Description of student fees

Student fees are assessed to maintain important supports and services. Fees are the amount paid by students to cover expenses that would not be considered part of normal instructional costs. The athletic, recreation and student well-being and services fee fund specific university activities. The other fees are collected for the USSU and GSA to fund their operations and related activities.
